Rating:

The battery system consists of two different types of lithium-ion batteries:

- 1. CS is the battery module, and CM includes system controller(BMU, BCU, IVU) and battery module.
- 2.CM contains the controller of the entire system, so each system must have one CM.
 3.System consists of at least 1 CM+1 CS and up to 1 CM+6 CS, refer to the number of batteries in the following models list for details.
