4 Wiring and Installation of Posts

1. Pour the foundation and drill holes.
2. Once the cable has emerged from the foundation, it is fed through the base of the post (The length of the cable protruding from the foundation shall be ≥ 1100 mm).
3. Feed the cable through the oval cable grommet on the front.
4. Secure the column.

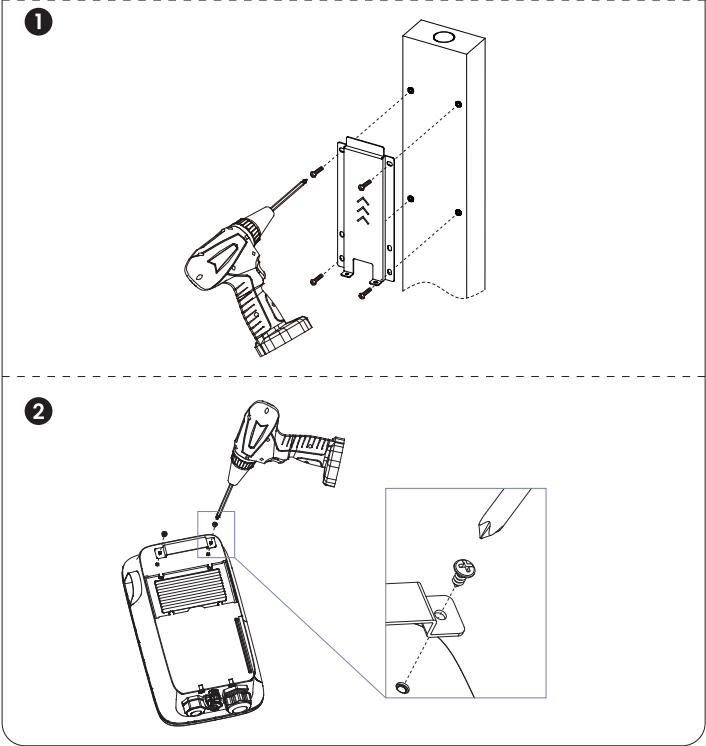

3

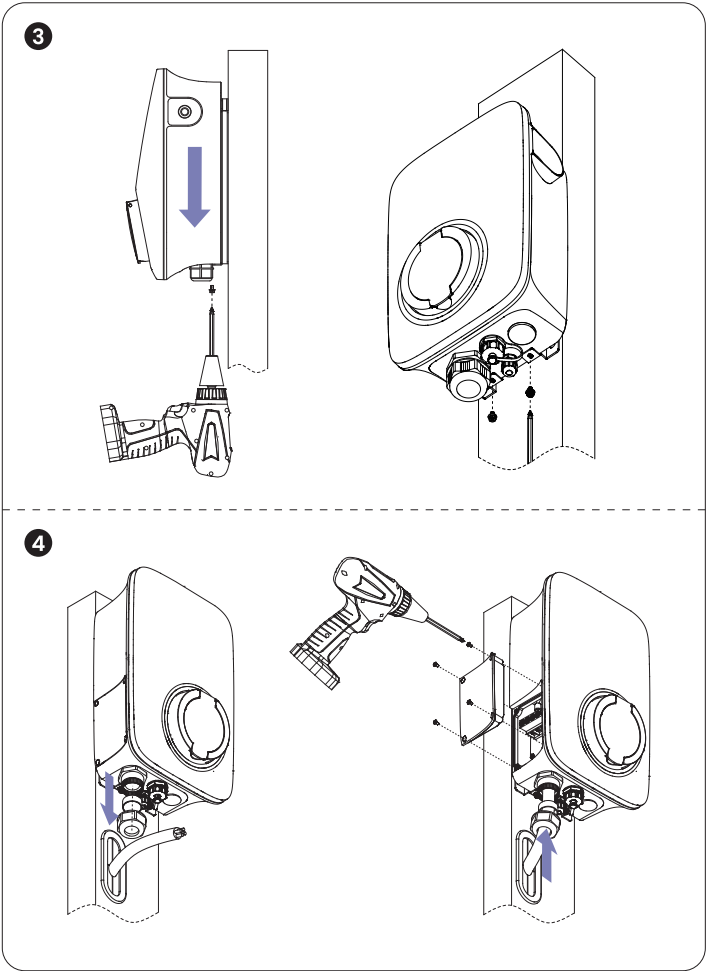

4

5 Install a charging station

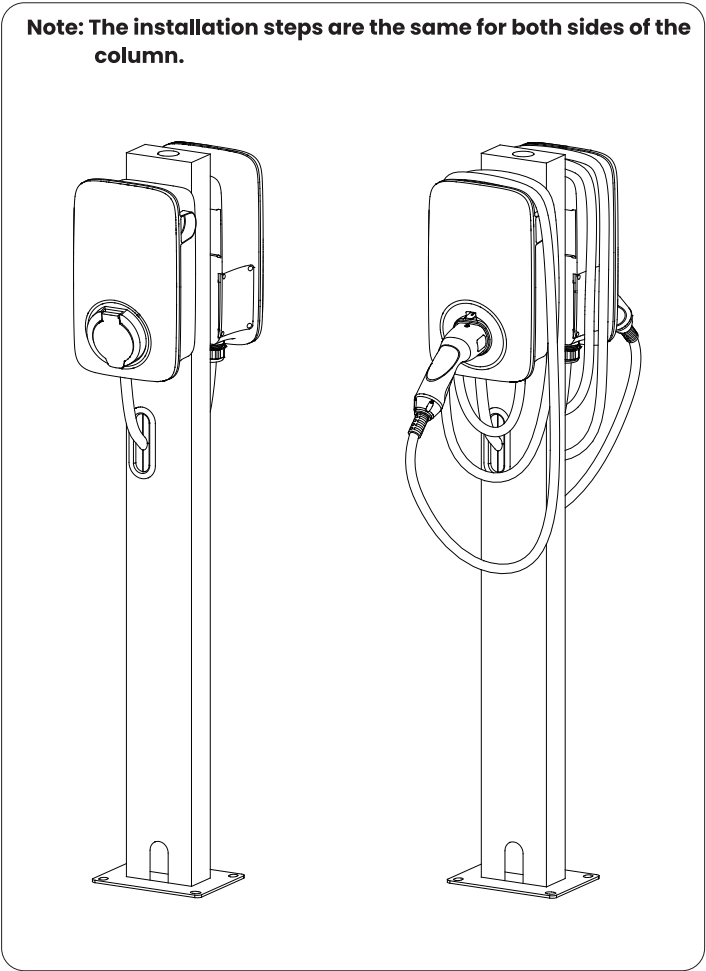

1. Fix the Mounting backplate to the column with screws.
2. Fix the Mounting bracket onto the EV Charger with screws.
3. Hang the EV Charger into the Mounting backplate, Tighten the bottom screw.
4. Connect the power cable and signal cables; installation complete (For detailed wiring instructions, please refer to the EV Charger product manual).
