# Certificate of compliance

**Applicant:** FOXESS CO., LTD.  
No.939, Jinhai Third Road, New Airport Industry Area,  
Longwan District, Wenzhou, Zhejiang  
China

**Product:** Photovoltaic (PV) inverter

**Model:** F3000-G2  
F3600-G2  
F4600-G2  
F5000-G2

Inverter for single-phase parallel connection to the public grid. The network monitoring and disconnection device is an integral part of the above-mentioned model.

## Applied rules and standards:

### EN 50549-1:2019-02

Requirements for parallel connection of installations with distribution networks - Part 1: Connection to an LV distribution network - Production of installations up to and including Type B

- 4.4 Normal operating range
- 4.5 Immunity to disturbances
- 4.6 Active response to frequency deviation
- 4.7 Power response to voltage variations and voltage changes
- 4.8 EMC and power quality
- 4.9 Interface protection
- 4.10 Connection and starting to generate electrical power
- 4.11 Ceasing and reduction of active power on set point
- 4.13 Requirements regarding single fault tolerance of interface protection system and interface switch

### C10/11:2021-03

Specific technical requirements for generator in parallel operation with the distribution network

### Commission Regulation (EU) 2016/631 of 14 April 2016

Establishing a network code on requirements for grid connection of generators (NC RFG).  
Type approval for generation units to use in Type A plants.

At the time of issue of this certificate, the representative product listed above corresponds to the stated rules and standards.

**Report number:** CGDY-ESH-P22060722      **Certification program:** NSOP-0032-DEU-ZE-V01

**Description of the structure of the power generation unit:**  
 The power generation unit is equipped with a PV and line-side EMC filter. The power generation unit has no galvanic isolation between DC input and AC output. Output switch-off is performed with single-fault tolerance based on the inverter bridge and two series-connected relays in (each) line and neutral. This enables a safe disconnection of the power generation unit from the network in case of error.

**Note:**  
 The settings of the interface protection are password protected adjustable.  
 In case the above stated generators are used with an external protection device, the protection settings of the inverters are to be adjusted according to the manufacturer's declaration.  
 The above stated generators are tested according to the requirements in the EN 50549-1:2019, Commission Regulation (EU) 2016/631 of 14 April 2016 and C10/11 for Belgium. Any modification that affects the stated tests must be named by the manufacturer/supplier of the product to ensure that the product meets all requirements.
